Non-GAAP Financial Measures

To supplement the financial results presented in accordance with generally accepted accounting principles in the United States ("GAAP"), Heidrick & Struggles presents certain non-GAAP financial measures. A "non-GAAP financial measure" is defined as a numerical measure of a company's financial performance that excludes or includes amounts different than the most directly comparable measure calculated and presented in accordance with GAAP in the statements of comprehensive income, balance sheets or statements of cash flow of the Company. Pursuant to the requirements of Regulation G, this earnings release contains the most directly comparable GAAP financial measure to the non-GAAP financial measure.

The non-GAAP financial measures used within this earnings release are adjusted operating income, adjusted operating income margin, adjusted net income, adjusted basic and diluted earnings per share, adjusted effective tax rate, adjusted EBITDA, adjusted EBITDA margin and impacts of foreign currency on current period results using prior period translation rates. These measures are presented because management uses this information to monitor and evaluate financial results and trends. Management believes this information is also useful for investors. Reconciliations of these non-GAAP financial measures with the most directly comparable measures calculated and presented in accordance with GAAP are provided as schedules attached to this release.

Adjusted operating income reflects the exclusion of restructuring charges and goodwill impairment.

Adjusted operating income margin refers to adjusted operating income as a percentage of net revenue in the same period.

Adjusted net income and adjusted diluted earnings per share reflect the exclusion of restructuring charges and goodwill impairment, net of tax.

Adjusted effective tax rate reflects the exclusion of restructuring charges and goodwill impairment, net of tax.

Adjusted EBITDA refers to earnings before interest, taxes, depreciation, intangible amortization, equity-settled stock compensation expense, earnout accretion, contingent compensation related to acquisitions, restructuring charges, goodwill impairment and other non-operating income (expense).

Adjusted EBITDA margin refers to adjusted EBITDA as a percentage of net revenue in the same period.

The Company evaluates its results of operations on both an as reported and a constant currency basis. The constant currency presentation is a non-GAAP financial measure, which excludes the impact of fluctuations in foreign currency exchange rates. The Company believes providing constant currency information provides valuable supplemental information regarding its results of operations, consistent with how it evaluates its performance. The Company calculates constant currency percentages by converting its financial results in a local currency for a period using the average exchange rate for the prior period to which it is comparing. This calculation may differ from similarly-titled measures used by other companies.
